Professional Summary

Motivated Computer Science undergraduate with a CGPA of 8.6 and strong foundations in Data Structures, DBMS, Operating Systems, and Software Development. Experienced in building full-stack web applications and machine learning solutions using Python, Django, Flask, React.js, and MySQL. Passionate about problem-solving, scalable software development, and leveraging AI technologies to solve real-world challenges.

Education

Jawaharlal Nehru Technological University, Hyderabad Bachelor of Technology in Computer Science and Engineering	Nov 2022 – Jul 2026 CGPA: 8.6
Trinity Junior College, Telangana Intermediate (MPC)	Jun 2020 – Jul 2022 97.1%
Telangana State Model School, Telangana SSC	Mar 2020 CGPA: 10.0

Technical Skills

- **Languages:** Python, Java, C, C++, JavaScript
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Backend:** Django, Flask, Node.js
- **Machine Learning:** Pandas, NumPy, Scikit-Learn
- **Databases:** MySQL, MongoDB, Firebase
- **Tools:** Git, GitHub, VS Code, IntelliJ IDEA
- **Core Subjects:** Data Structures, DBMS, Operating Systems, Computer Networks, Machine Learning

Projects

Emergency Service Provider System

- Developed a full-stack emergency response platform for ambulance booking and hospital search.
- Integrated Google Maps API for real-time tracking, nearest ambulance allocation, and live location sharing.
- Built separate dashboards for users and service providers using Django, MySQL, Firebase, HTML, CSS, and JavaScript.

FoodAI – AI-Powered Smart Food Ordering System

- Developed an AI-powered food ordering and smart checkout application using React.js, Tailwind CSS, Node.js, Express.js, and Groq AI.
- Implemented dynamic cart management with add/remove functionality, live cart updates, and LocalStorage persistence.
- Integrated Groq AI to generate personalized food recommendations based on user cart selections.
- Designed a responsive modern UI inspired by real-world food delivery platforms.

Crop Recommendation System

- Developed a machine learning based crop recommendation system using soil nutrients and environmental parameters.
- Implemented preprocessing and prediction models using Scikit-Learn, Pandas, and NumPy.
- Built a responsive web application using Flask, HTML, CSS, and JavaScript for smart agriculture solutions.

Certifications

- Trust & Security with Google Cloud
- AI for Beginners – HP LIFE
- Deloitte Australia Technology Job Simulation
- Tata GenAI Powered Data Analytics Job Simulation
- AWS Introduction to Generative AI

Achievements

- Solved 300+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks.
- Completed industry-recognized certifications in Google Cloud, Generative AI, and Data Analytics.
- Developed multiple full-stack and machine learning projects addressing real-world challenges.
